

The Gateway to the Orthopaedic Internet

Have You Discovered OWL?

OWL (www.orthopaedicweblinks.com) is the largest index of online information for orthopaedic surgeons, residents, nurses, patients, vendors and allied health professionals interested in orthopaedic surgery and traumatology. OWL is a free, web-based resource designed to help you find online orthopaedic information quickly and easily. OWL is also a community of people like you, who strive to provide an authoritative directory of orthopaedics.

FIND Resources Using ...

- **OWL Directory** to find specific peer reviewed resources available in your discipline
- **OWL Meta Search** to search all the best search engines in one go for maximum efficiency
- **OWL Web Search** to get better, more relevant search results from your Google searches

OWL offers three methods for finding orthopaedic resources in one centralized solution!

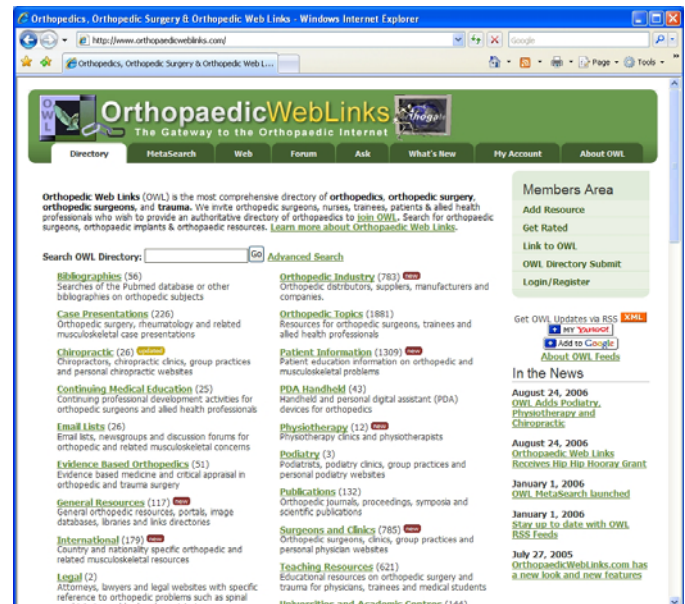

FIND Resources In ...

23 primary categories covering major areas such as:

- | | |
|--------------------------------|-----------------------------------|
| • Case Presentations | • Organizations & Associations |
| • Chiropractic | • Orthopedic Industry |
| • Continuing Medical Education | • Orthopedic Topics |
| • Email Lists | • Patient Information |
| • Evidence Based Orthopedics | • PDA Handheld |
| • General Resources | • Physiotherapy |
| • International | • Podiatry |
| • Legal | • Publications |
| • Meetings | • Surgeons and Clinics |
| • Multimedia Presentations | • Teaching Resources |
| | • Universities & Academic Centres |

The OWL collection is larger than any other comparable collection in all these categories.

- OWL resources are validated and peer reviewed to ensure interest to orthopaedic surgeons, patients, and allied health professionals.
- OWL receives over 80,000 unique visitors per month and 8,000 page views per day.
- OWL is the foremost information resource on the Orthopaedic Internet and aims to become an indispensable institution.
